Deliverables (left and right side labels)

In development with Regional Partnerships and others

Statewide ICN Infrastructure Development Plan

New Tools
- In context notification & alerting tools
- Risk stratification / predictive modeling tools
- Basic Care Management software
- Data Router / clinical data normalization
- Clinical portal enhancements
- CCDA / Care Plan parsing

HIE Infrastructures
- Patient / provider relationship identification
- CRISP Reporting Services analytics (CRS)
- Clinical query portal
- Privacy / consent management utility
- Identity management
- Encounter Notification Services (ENS)

← Data Router Components →

Inputs
- Administrative / visit data (need ambulatory connectivity)
- PDMP
- Processed Case Mix data
- Medicare claims data
- Enrollment data, patient panels
- HIE clinical data

IT Stack ↑

Legend:
- Hatched — New or needs significant development
- Solid — Existing

Working Version 1.5
